

RESOLUTION NO. 2213

A RESOLUTION AMENDING THE CITY'S MASTER FEE SCHEDULE AND ADOPTING A RATE FOR INDUSTRIAL WASTEWATER DISCHARGE.

WHEREAS, the City of Hermiston (City) has established a master fee schedule and amendments to the schedule shall be by resolution;

WHEREAS, the City provides residential and commercial sewer service and has established fees for sewer service; and

WHEREAS, the City recognizes that industrial sewer users have the potential to discharge wastewater that has higher levels of biochemical oxygen demand (BOD) and total suspended solids (TSS), and Ammonia than residential customers and by establishing a rate for industrial discharge will prevent the costs of treatment for industrial wastewater being passed to other ratepayers; and

WHEREAS, the City defines an Industrial User as any existing, or prospective user of the sewer system who exceeds the Recycled Water Treatment Plant's design parameters for treating BOD, TSS, and Ammonia at or above the following amounts:

- BOD: 470 mg/L
- TSS: 392 mg/L
- Ammonia: 53 mg/L

WHEREAS, the City desires to establish rates for Industrial wastewater discharge into the City sewer system, at the following surcharge rates, BOD: \$1.46/lbs.; TSS: \$1.56/lbs.; and Ammonia: \$1.59/lbs.; and

WHEREAS, an updated Master Fee schedule including a rate for Industrial Discharge Users is attached hereto.

NOW, THEREFORE, THE CITY OF HERMISTON RESOLVES AS FOLLOWS:

1. That an Industrial Discharge Use Surcharge is approved and the attached updated Master Fee Schedule including the rate for Industrial Discharge Users is approved and adopted;
2. That this Resolution shall supersede Resolution No. 2207, relating to the Master Fee Schedule.
3. That pursuant to ORS 221.310(3), that this resolution is effective immediately upon its passage.
